

CS 492/493 Progress Report.

Instructions: Each team member should enter their activities performed for the capstone project in the last two weeks, as well as their expected activities for the next two weeks, along with anything holding them up on completing their activities. These should be discussed by the team and their advisor(s) during the weekly/biweekly meetings, and the advisor(s) should sign and date the sheet indicating a correct assessment of the team's progress. Students need to upload a signed and scanned version to blackboard. Progress reports uploaded to blackboard without a signature and score for progress will receive a 0 for progress.

Team/Project Name: Project Rebel

Team Member #1: Seth Thoele

What I did since last progress report:

Various small things—some bug fixes, setting up a tour system, forking a Vue tour Github repo to customize it for our needs, working with Grant on a couple things, etc.

Anything holding me up on my last progress report's expected activities:

Nothing.

What I plan to do before the next progress report:

Not entirely sure, pretty much just whatever Nolan wants me to do. We're getting to a bit of crunch mode as launch day approaches so just whatever needs doing to prepare for that. Probably a lot of bug squashing, small feature implementations, nothing too big or crazy.

Team Member #2: Grant Haataja

What I did since last progress report:

Finished creating the user feedback form and styling it. Completed various bug fixes. Added links from the public website page to our terms and conditions, privacy policy, and refund policy, and created routes for each of those pages and styled them.

Anything holding me up on my last progress report's expected activities:

Nope.

What I plan to do before the next progress report:

Error checking and bug fixing. Initial launch date for beta testing is March 10th, so this week we will be finding tons more bugs that we will need to fix.

Date: 03/09/19
